

## Preface

We extend a warm welcome to the 7<sup>th</sup> Borobudur International Symposium 2025 in conjunction with 3<sup>rd</sup> International Conference on Environment, Green Technology, and Digital Society 2025. This year's symposium is themed "Empowering Sustainable Science and Technology For Environmental Resilience and Green Innovation," serves as a global forum for scholars, researchers, and industry leaders to converge and exchange groundbreaking ideas at the intersection of sustainability and digital innovation. As the world faces unprecedented challenges in energy, environment, and technology, this event emphasizes the pivotal role of interdisciplinary collaboration in forging a sustainable future. The symposium spans critical fields, especially in the field of energy and engineering studies.

This area is vital in driving the innovations necessary for building resilient, eco-friendly infrastructures and advancing a digitally connected society. By bringing together diverse expertise and fostering synergies across disciplines, this event aims to inspire new approaches and solutions that not only meet current global demands but also pave the way for a sustainable and technologically integrated world.

We are particularly honored to have a distinguished lineup of keynote speakers which their insightful presentations will undoubtedly enrich our discussions and inspire innovative solutions.

1. Prof. Januar P. Siregar, from Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia, and
2. Prof. Hijaz Ahmad, from Near East University, Turkey.

We extend our sincere gratitude to all participants, presenters, and organizers for their contributions to the success of this event. Let us work together to create a sustainable future for generations to come.
