Preface

We extend a warm welcome to the 6th Borobudur International Symposium 2024 in conjunction with 2nd International Conference on Environment, Green Technology, and Digital Society 2024. This year's symposium is themed "Co-creating a Sustainable Future: Green Technology and Digital Society," serves as a global forum for scholars, researchers, and industry leaders to converge and exchange ground-breaking ideas at the intersection of sustainability and digital innovation. As the world faces unprecedented challenges in energy, environment, and technology, this event emphasizes the pivotal role of interdisciplinary collaboration in forging a sustainable future. The symposium spans critical fields, especially in the field of information technology and computer science studies.

This area is vital in driving the innovations necessary for building resilient, eco-friendly infrastructures and advancing a digitally connected society. By bringing together diverse expertise and fostering synergies across disciplines, this event aims to inspire new approaches and solutions that not only meet current global demands but also pave the way for a sustainable and technologically integrated world.

We are particularly honored to have a distinguished lineup of keynote speakers which their insightful presentations will undoubtedly enrich our discussions and inspire innovative solutions.

1. Prof. Astri Rinanti, from Trisakti University, Indonesia, and
2. Assoc. Prof. Muhammad Aziz, from The University of Tokyo, Japan.

We extend our sincere gratitude to all participants, presenters, and organizers for their contributions to the success of this event. Let us work together to create a sustainable future for generations to come.
